### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6, 8, 10, and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Carty #6,766,881. Carty, as best seen in Figures 2, 3, 5, 6, discloses a ladder system comprised of step ladder 10, a flexible tool holder having a top panel 20, front panel 50, top ladder step securing straps 28, 29, which allow for the only connection to the ladder, side panels 32, 36, side panel open top pouches 33, 37, front panel open top pouches 51, and holder top panel portion 39.

### ***Allowable Subject Matter***

Claims 7, 9, and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The primary reason for the allowable subject matter of claim 7 is the inclusion of the top panel having a reinforcement strip to which the securing strap is attached. For claim 9, it is the inclusion of the side panels being directly attached to the front panel. For claim 11, it is the inclusion of the strap of the top panel having a hook that is attached to a rung of the ladder so as to secure the top panel thereto. The prior art of record fails to teach or suggest the claimed features absent the applicant's own disclosure.

Art Unit: 3634

*Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McGee #4,356,854, Weller #5,749,437, Smith #5,603,405, Hardy #5,638,915, Cassells #5,647,453, Taggart #5,971,101, Armstrong #5,988,383, and Cook #4,773,535 are cited to teach ladder tool holder assemblies.
